PROFILE

I am an Information Technology graduate with experience in information system development, data analysis, report preparation, and industrial internship practice. I completed a five-month internship as an IT Support Intern at PT Perta Arun Gas and a six-month internship as an Innovation Staff Intern at PT Pupuk Iskandar Muda, where I gained practical experience in system development, data management, and innovation-related activities in an industrial environment. I possess skills in data analysis and processing, process evaluation, and report preparation to support decision-making, improve efficiency, and foster work innovation. I am accustomed to working with a structured, detail-oriented, and process-oriented approach, and I am able to work both independently and collaboratively in a team to support operational effectiveness and quality improvement.

EDUCATION

D IV — Information Technology, Lhokseumawe State Polytechnic

2021 - 2025

- Information Technology (Bachelor's Degree)
- GPA: 3.66/4.00
- Relevant Coursework: Web Design, Web Programming, Algorithms and Data Structures, Database Systems, Data Mining, Big Data, and Database Administration.
- Final Project: *Stunting Classification Model in Toddlers Using Support Vector Machine (SVM)* (Case Study: Samalanga Community Health Center) – focused on risk factor analysis, data processing, and model accuracy evaluation to support stunting classification in healthcare facilities.

EXPERIENCES

IT Support Intern — PT. Perta Arun Gas (February – July)

2024

- Designed and implemented a web-based employee leave application called CutiPro to support structured and efficient leave submission, approval, and documentation processes.
- Participated in data management and digital archive integration within the internal system.
- Learned information system workflows and IT support practices within the oil and gas industry environment.
- Gained an understanding of the implementation of information technology to support company operational activities.

Innovation Staff Intern — PT. Pupuk Iskandar Muda (November – Present)

2025-2026

- Participated in the development and facilitation of innovation programs to support the improvement of work process effectiveness within the unit.
- Managed innovation-related data administratively, including data collection, entry, recapitulation, updates, and structured document archiving.
- Assisted in preparing reports, documentation, and managing innovation-related files as supporting materials for activity monitoring and evaluation.
- Learned the process of developing work procedures and work instructions, as well as gaining an understanding of the internal audit process within the organization.
- Contributed to the development of an innovation management application system to support the management and monitoring of innovation activities.

PROJECT

StuntClass (Stunting Classification System)

2025

- Developed a toddler stunting classification system using the Support Vector Machine (SVM) algorithm.
- Managed data processing activities, including data collection, cleaning, analysis, and dataset preparation for machine learning model training.
- Developed both frontend and backend components using Laravel and Flask API to integrate the machine learning model into the system.

Innovation Management System Development

2026

- Enhanced and optimized the Innovation Management System by developing additional features and expanding system capabilities.
- Transformed a system that previously managed only GKM innovation data into a comprehensive platform capable of managing EIF, SS, and GKM innovation programs.
- Developed additional features to support innovation data management, monitoring, and reporting processes.

ACHIEVEMENT

Scientific Journal Publication – IJEIS (SINTA 3)

2025

- Contributed as the third author to an article titled “*Stunting Classification Model for Toddlers Using SMOTE and Support Vector Machine (SVM) (Case Study: Samalanga Community Health Center)*”, published in the Indonesian Journal of Electronics and Instrumentation Systems (IJEIS), an accredited SINTA 3 journal.
- Contributed to data processing, SVM model development, and the preparation of sections of the scientific manuscript.

TRAINING

Soft Skills & Career Preparation Training — Politeknik Negeri Lhokseumawe

2025

- Participated in career readiness training, including CV writing, LinkedIn profile development, interview preparation, and psychological test preparation, as well as professional communication development.

ISO 37001 Awareness Transition & ISO 19011:2018 Refreshment Training — PT Pupuk Iskandar

Muda

2026

- Participated in training on ISO 37001 (Anti-Bribery Management System) and ISO 19011:2018 (Guidelines for Auditing Management Systems).
- Gained understanding of internal audit principles, compliance processes, and the implementation of management system standards in organizations.

SKILLS

Hard Skill

- Office Administration: Proficient in Microsoft Word, Excel, and PowerPoint for data processing, report preparation, and presentations.
- Data Analysis & Reporting: Skilled in data analysis and processing using Excel and SQL, as well as preparing reports and data evaluations to support decision-making.
- Research & Data Collection: Experienced in collecting and processing data through observation, interviews, document studies, and needs analysis to support program or innovation evaluation.
- Systems & Applications: Web development using Laravel, HTML, CSS, and JavaScript, as well as database management using MySQL.
- Data & Document Management: Experienced in digital archiving, data entry, recapitulation, and structured document management.
- Digital Tools & Collaboration: Microsoft Office, Google Workspace, and Git/GitHub for collaboration and project management.
- Digital Publication & Creativity: Social media management, digital publication, photography, videography, and design using Canva.

Language

- Indonesian: Native / Professional
- English: Basic

Soft Skill

- Effective Communication: Able to convey information clearly and in a structured manner in meetings, social media, and community outreach activities.
- Time Management: Capable of effectively managing time between academic responsibilities, organizational activities, and community service.
- Coordination & Initiative: Actively supports program coordination, assists in activity management, and demonstrates initiative in task completion and team collaboration.
- Teamwork: Experienced in collaborating with individuals from diverse divisions and backgrounds in both campus organizations and community activities.
- Problem Solving: Skilled in resolving technical and non-technical issues, including data management, digital archiving, and field activity challenges.
- Adaptability & Fast Learner: Able to adapt quickly to new environments and eager to learn new skills in technology and organizational settings.
- Ability to Work Under Pressure: Able to manage stress and maintain performance while meeting targets and deadlines.
